```java
package AST;

import iValue.IValue;

public class ASTSeq implements ASTNode {

    private ASTNode exp1;
    private ASTNode exp2;

    public ASTSeq(ASTNode exp1, ASTNode exp2) {
        this.exp1 = exp1;
        this.exp2 = exp2;
    }

    @Override
    public IValue eval(Environment e) {
        IValue v1 = exp1.eval(e);
        IValue v2 = exp2.eval(e);
        return v2;
    }

}
```
