```java
package AST;

import java.util.List;

public class ASTFun implements ASTNode {

    List<String> params;
    ASTNode exp;

    public ASTFun(List<String> params, ASTNode exp) {
        this.params = params;
        this.exp = exp;
    }

    @Override
    public IValue eval(Environment e) {
        return new Closure(params, exp, e);
    }

}
```
